

MACHINE SAFETY SEMINAR AND AUTOMATION FAIR

With almost fifty years of experience in application and support of electrical control, automation and safety devices, Ramco offers invaluable knowledge and resources to help increase safety and efficiency on your plant floor.

WHO SHOULD ATTEND:

- Machine operators
- Machine maintenance personnel
- Process engineers
- Production engineers
- Controls engineers
- Electricians
- Design engineers
- Corporate safety committee
- Integrators

Anyone who is involved in any way with machine safe guarding should attend this course! Today's automated workplace is potentially more hazardous than ever. So is today's legal climate, which holds manufacturers as well as end users increasingly liable for worker injury.

GOALS OF THE SEMINAR

- ▶ Interactive forum for understanding the "WHY" and the "HOW" of machine safety in the 21st century
- ▶ Present new and better ways to protect employees from injury
- ▶ Introduce components and techniques to reduce machine downtime
- ▶ Provide insight into new and emerging safety requirements
- ▶ Demonstrate ways to reduce liability exposure

Wednesday, October 12

9 AM - 3:30 PM
